Commanders Report
Breaking News out of Israel June 30, 2014**

The Times of Israel has reported that the remains of three kidnapped boys in Israel have been recovered. Initial reports show they were killed almost immediately and the search for them was actually a recovery effort. The taunting by Hamas and PLO minions make the situation all the more deadly.

Taking this in light of Ken Timmerman's theory that Iran was behind Benghazi, it makes no sense for our government to work with any of these three groups for any reason. Iran has already been found civilly culpable in the WTC II bombings. Hamas is a terrorist organization, as is the Palestinian Authority.

UN Resolution 242, unanimously passed in 1968, granted Israel this territory because it had been taken while driving back aggressive attacks, legal under the UN Charter. Israel has already fulfilled any and all obligations under 242 to give back SOME NOT ALL land that was taken in this self-defense move. Judea, Samaria, and Golan were deemed essential to the defense of Israel by numerous US military studies.

To work with the sworn enemies of Israel in any capacity is an abrogation of the office of the Executive and his staff. To down play the deadly, insidious, amoral character of these three groups is to deny reality.

The foreign policy, if one deems to call this mish mash of actions a policy, in the Mid-East is an atrocity. If Iran was behind the attacks in Benghazi, as is deemed plausible, this was an act of war by Iran on us, and not the first. The kidnapping of the boys and their murder is likewise the acts of a warlike people. One can only wait to see what video this administration will blame this atrocity on. There must be some counter or these atrocities will go on.

Larry J O'Daniel is a Director of the 250,000 member coalition and the POW Chair. He is a combat veteran of Vietnam, the Phoenix Program, and serves on the Counter Terrorism Committee. He likewise works with several MidEast groups in an information gathering mode.
